LMC Manna Research

LMC Manna Research is looking for healthy, non-pregnant females to participate in a clinical Respiratory Syncytial Virus (RSV) research study. The purpose of this study will be to explore the safety and consistency of an investigational vaccine and how it works when administered at the same time with the Flu vaccine. The goal is to understand the potential impact it has on RSV prevention in infants. Click the button for more information and to see if you're eligible.

Could there be a future cure for Type 1 Diabetes?

The reality of a cure is always on the minds of people with Type 1 Diabetes! ViaCyte is a regenerative medicine company focused on delivering novel stem cell-derived replacement therapies. With this therapy, they are looking to improve treatments to reverse Type 1 Diabetes! This may also be a solution for Type 2 Diabetes patients who require insulin management too.

LMC Healthcare will be working with ViaCyte in the coming months so if you would like to learn more please reach out to **research@lmcmanna.com** and / or **1-833-323-JOIN**
