Carbohydrate Counting Resources

Carb Counting 101

- Carb counting is a skill that will help you plan your meals and minimize blood sugar fluctuations
- Check your blood sugars more frequently, especially before and 2-hours after meals. This is the best way to assess your carb counting abilities
- It's impossible to perfectly carb count all the time, so give your best guesstimate
- It's impossible to be perfect at every meal and snack! There will be setbacks, but over time your carb counting skills will improve

Apps (free!)

- mySugr (iPhone and Android) Includes a blood sugar tracker, carb log, insulin calculator, and estimated A1c
- Glucose Buddy (iPhone) Track blood sugars, medications, and bloc pressure. Includes a food database to help with carb counting
- MyFitnessPal (iPhone and Android) This app includes a food database, barcode scanner, recipe analyzer, and restaurant logs for favourite menu items

• Calorieking (iPhone and android) Has over 100,000 food items and 260 fast food chains and restaurants

• Glooko (iPhone and Android) The apps syncs info from your meter, pump, and CGM, allowing you to track your insulin, food, and physical activity data

Food Scales

A nutrition scale removes a lot of the guesswork out of carb counting. It measures the nutrient profile of hundreds of different foods, including carbs.

Brands include **Starfrit**, **Kitrics**, and **Perfect Portions**, and they are retail for \$35-45
