

YOUR FOOTCARE NEEDS. OUR TRUSTED SOLUTIONS.

LMC Footcare

ABOUT US

WHAT WE TREAT

We treat complex foot conditions such as diabetic wounds on a daily basis. Making the simple cases such as plantar fasciitis and plantar warts, just that... handled with ease by our team of Registered Chiropodists, Canadian Certified Pedorthists and Foot Care Nurses.

COMPLEX CONDITIONS

- Severe diabetic wounds
- Soft tissue surgeries

MODERATE CONDITIONS

- Ingrown toenails
- Fungal infections
- Biomechanical conditions

SIMPLE CONDITIONS

- Plantar Fasciitis
- Warts
- Metatarsalgia

TRAILBLAZERS IN THE WORLD OF RESEARCH

LMC Healthcare has one of the largest research divisions in all of North America, Centricity Research. Our footcare providers are uniquely afforded the opportunity to participate in cutting edge research as it pertains to foot health. A research based approach is taken with all patients.

A COLLABORATIVE APPROACH

Like LMC's endocrinologists, we keep you, the referring doctors, informed every step of the way. Our footcare team will provide assessment and treatment summaries for all patients.

MEMBERS OF THE APPROVED PROVIDER NETWORK

LMC Healthcare is honoured to have been included in the Approved Provider Network. Many footcare providers are vetted and only a small handful of the most skilled and trusted companies are allowed to become the exclusive providers for various hospitals and insurance companies in Ontario.
